WE CALCULATE TAX AND SCORE RECYCLABILITY

Our web-based platform scores the recyclability of your packaging based on the waste management solutions available in Europe and calculates your expected tax under applicable legislation.

WE DELIVER SUGGESTIONS TO IMPROVE CIRCULARITY AND REDUCE TAX PAYMENTS

Based on your packaging data, our web-based platform generates suggestions for improvements to increase the circularity of your packaging and reduce your expected tax. As a result, our solution occupies the sweet spot between environmental and financial optimisation.

WE TRACK YOUR PROGRESS

Our web-based platform determines the recyclability of your packaging using our circularity score and allows you to track your progress for the purpose of environmental accounting, ESG, etc. The circularity score is updated on an ongoing basis to reflect the development in materials and recycling.

WE BUILD CONNECTIONS

We use our expertise and web-based platform to build connections to facilitate data management and reporting to environmental accounts, DPA, credit rating agencies, etc. by enabling transfer of data to major Producer Responsibility Organisations (PRO), accountants, banks, GS1 and other collaboration partners.

WE CREATE DETAILED PACKAGING DATA

We use image recognition and our extensive knowledge in packaging to create detailed data based on documentation. All your data is held on our web-based platform to enable analysis and optimisation of your packaging choices and facilitate reporting to Producer Responsibility Organisations.

ABOUT RECYKLA

We are a web-based consultancy business with focus on sustainability and circularity in packaging. We have worked in recycling of packaging, packaging materials and waste management since 2017.
